ASSIST STREET

AI ASSISTANTS FOR LOCAL BUSINESSES

Your front desk never closes.

An assistant on your website that answers customers' questions instantly, day and night, in their own language, and sends you the enquiries that are ready to act on. We set it up and look after it for you.

Customers don't wait

- Most people look you up in the evening or at the weekend, when nobody is there to reply.
- If they don't get an answer quickly, they message the next business on Google.
- Your team spends hours answering the same questions about prices, times and availability.

What you get

- Instant answers from your own prices, services and opening hours, never made up
- Replies in the customer's language: English, Bengali, Arabic, Spanish and many more
- The customer's name, contact details and what they need, emailed to you
- Anything it can't answer goes straight to you, and every conversation is in your dashboard

Live in a week, in three steps

1. **Tell us about your business**
   A 15-minute chat, or send us your price list and FAQs.
2. **We build and test it**
   With your information, in your colours.
3. **You get the enquiries**
   By email, ready to call back, book or quote.

We can also build your website with the assistant built in, and custom automation. WhatsApp and booking assistants are on our roadmap.

EXAMPLE CHAT, 11:42PM

Hi, how much is a check-up? Do you have anything on Saturday?

A check-up is £45 for new patients. We're open Saturdays 9am to 1pm. Shall I ask the team to book you in? What's your name and number?

New enquiry: check-up, Saturday morning, new patient. Name and mobile included.

Start with a free call

Tell us how your business works. We'll say honestly whether it's a fit and give you a fixed quote. No long contract: plans roll monthly, and our first 10 clients get half-price setup.

Starter Assistant, alerts and dashboard	**£79 / month** + £249 setup
Managed We keep it updated, monthly report	**£199 / month** + £399 setup
